

**2018 Apprentice
CONDUCTOR TRANSFER
Mean Time: 8 minutes
Drop Dead Time: 12 minutes**

This is a de-energized event. The event consists of a two phase construction, straight line, with neutral 54" in. from top of pole, and an additional under build 24" in. under neutral. There will be two fiberglass layout arms fastened at top of pole for transfer. One phase wire will be tied in on cross-arm and the other phase wire will be stationed in fiberglass layout arm. There will be an additional fiberglass layout arm above phase wire that is tied in.

Time starts at the judge's signal, after the five-minute set up time.

Apprentice shall sound pole with a hammer prior to climbing.

Hardhat, safety glasses and leather gloves are required (rubber gloves are not required).

Apprentice will first throw a rope between the neutral and under build, and tie it off to an anchor using 3= half hitch knots. (He will have only 3 attempts)

Apprentice will climb pole, remove phase wire out of fiberglass layout arm and tie it in properly using preform ties.

Apprentice will then move around pole and untie other phase and lay it into fiberglass layout arm.

Apprentice must raise and lower material up with rope and bag that will be given to them.

Time stops when the apprentice has one foot on the ground.

The mean time for this event is 8 minutes. The drop dead time is 12 minutes

NOTE: Every attempt will be made to run the event exactly as described above. In the event of unforeseen circumstances or conditions, the Rodeo Event Committee reserves the right to alter the event as needed.
